Accessory Dwelling Units

DATE: January 1, 2023

CREATED BY: Plan Review Division

Purpose:

As a customer service initiative, the Department created this Information Bulletin (IB) to inform our customers of the current requirements and permitting process for accessory dwelling units (ADUs), including accessory detached dwelling units (ADDUs), due to the increased number of ADUs being permitted throughout the City of San Antonio.

Scope:

With the increased number of permit applications for accessory dwelling units, Development Services (DSD) has encountered a number of frequently asked questions (FAQs) regarding the requirements and permitting procedures:

FAQ #1: What is the maximum allowable footprint for an ADU?

Answer: Accessory dwelling units shall not exceed 800 sf gross floor area or 50% of the gross floor area of the primary structure up to a maximum of 1,600 sf.

FAQ #2: What are the minimum setbacks required?

Answer: Accessory detached dwelling units require a minimum setback of 5 ft from the side and rear property lines; the setback may be reduced to 3 ft if the structure has no overhang. Attached accessory dwelling units shall meet the required setbacks of the primary structure governed by the underlying zoning district. Minimum fire ratings and setbacks must comply with the International Residential Code.

FAQ #3: Can the ADU be on a separate electrical/water/sewer system/meter?

Answer: Yes. The ADU will need to be addressed separately from the primary structure to do so.

FAQ #4: What other restrictions exist for ADUs?

Answer: Only one ADU is permitted per lot, and it must be in the rear; ADDUs over 800sf gross floor area shall have one parking spot; and an ADDU may not exceed 25 ft or two stories in height. The property owner must occupy either the principal unit or the ADU as their permanent residence. The owner must also record a covenant with the items in [35-371\(a\)\(1\)](#) with the Bexar County Clerk; an example covenant is shown in Attachment B.
